

About this brochure

This brochure is about circles as an element of design. The neutral, calm shape enables a lot of different design options in architecture and interior design. We would like to show you a summary of our product range and different examples of use for the different light ring types. All luminaires are equipped with the latest, ecological LED-technology. This provides, beside the economical facts, a great flexibility in light quality according to the specifications of the building. SEEGER provides high-standard quality, made in Germany, and improves its products continuously. Improvements are achieved through the cooperation with architects and lighting-designers, to provide you the best possible products and lighting-solutions.

"IT'S A CIRCLE"

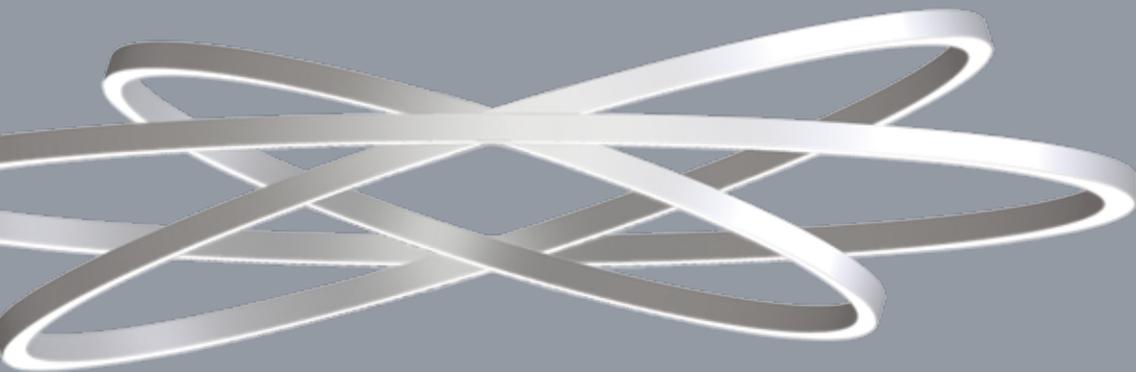

The idea of this product-family was to break with the standard products of SEEGER. They prove their sense for design with this. The circular shape of the wall-, pendant- and floor lamps achieve a high recognition factor. Its timeless and functional design allows the light ring

to be integrated into many different ambiances. Every room is illuminated in its own way, but with the same identical type of shape. Since the beginning of time, the circle or ring, symbolizes attributes like protection, eternity and conformity. We wanted to refer to this basic attribute, the

conformity. It is a basic element of a harmonic interior design. Elegant, simple, uniform, a effect in every room situation.

Vita

Alexander Rempel studied at the university of applied science in Darmstadt and graduated in industrial design. His diploma project was to design a floor lamp. International orientated, because of his semester abroad, he proved his commitment for big customers of the electrical industry. Today he ventures in to the design of a light ring for SEEGER KG.

LED suspended light ring

- › direct or direct/indirect light emission
- › made of sharp-edged extruded aluminium sheath
- › surface powder-coated
- › opal acrylic cover
- › completely closed luminaire
- › ready-to-connect wiring
- › LED COB-Array, L90/B10 – 50000 hrs

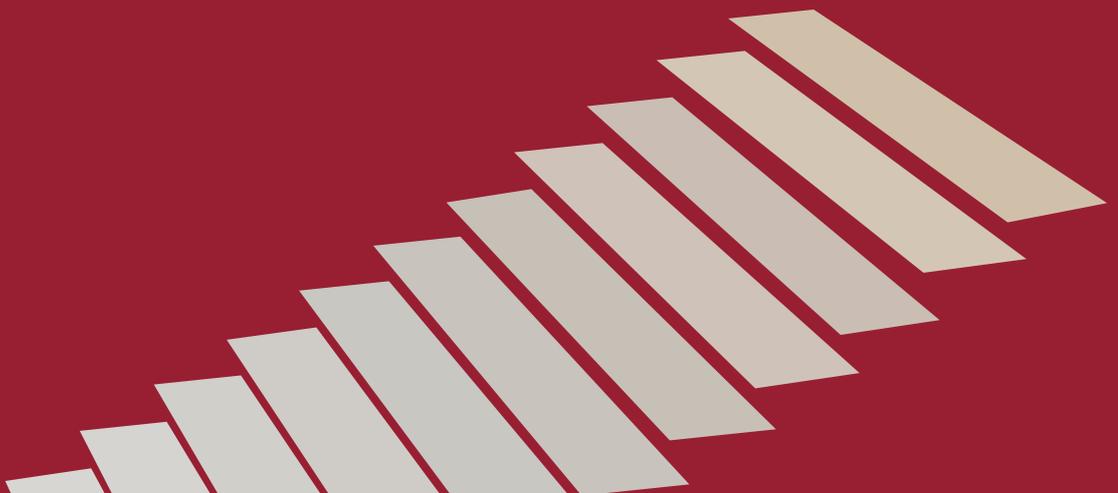

OUR SUSPENDED LIGHT RINGS AS AN ELEMENT OF DESIGN

Since 2010, the LED-technology is on its triumphant advance. It is efficient, long lasting and easy to operate. LEDs can be perfectly integrated into intelligent home automation. Further advantages are offered to lovers of design. Light can be directed by elaborated optics, which allows new shapes and designs. The trend goes towards minimal, straight lamp design, because of the advantages of small LEDs. Our suspended luminaires

were designed, focussed on that aspect. The modern design appears, even with large diameter, elegant and filigree. The light rings are pleasant restrained integrated into the interior design, without imposing to the customer. Exiting installations are possible. Interesting contrasts with other elements of design are created, which creates central eye-catcher in every room.

We also offer recessed luminaires for wall and ceiling, in addition to the suspended luminaires. By its architectural, harmonic design the luminaire fits, nearly unrecognizable, into the modern interior. Available in three sizes, this luminaires can be used in small or big rooms. Used as a single or combined luminaire, it structures the room and highlights separated areas without dominating the room.

A timeless, well-designed pendant luminaire. This classic light ring can be suspended in different heights, just how you need it.

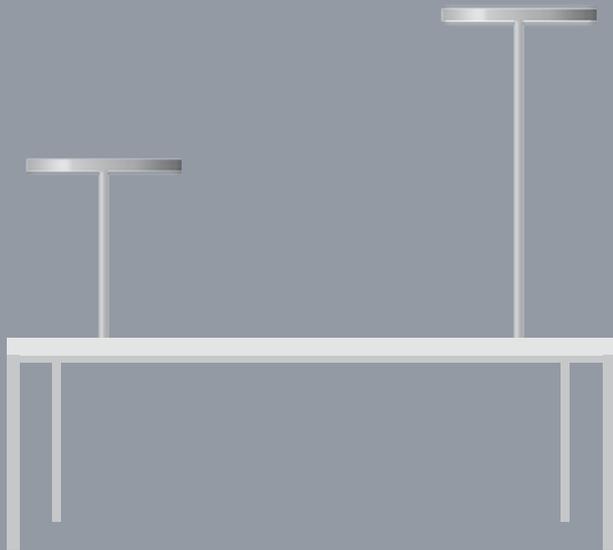

The light ring as a stand-alone-solution is ideal for office requirements, wether as general lighting or for working places. The base of the lamp has a practical cross-shape, which allows to be placed near tables or other objects. Together with the desk lighting in the same design, it creates a uniform overall appearance.

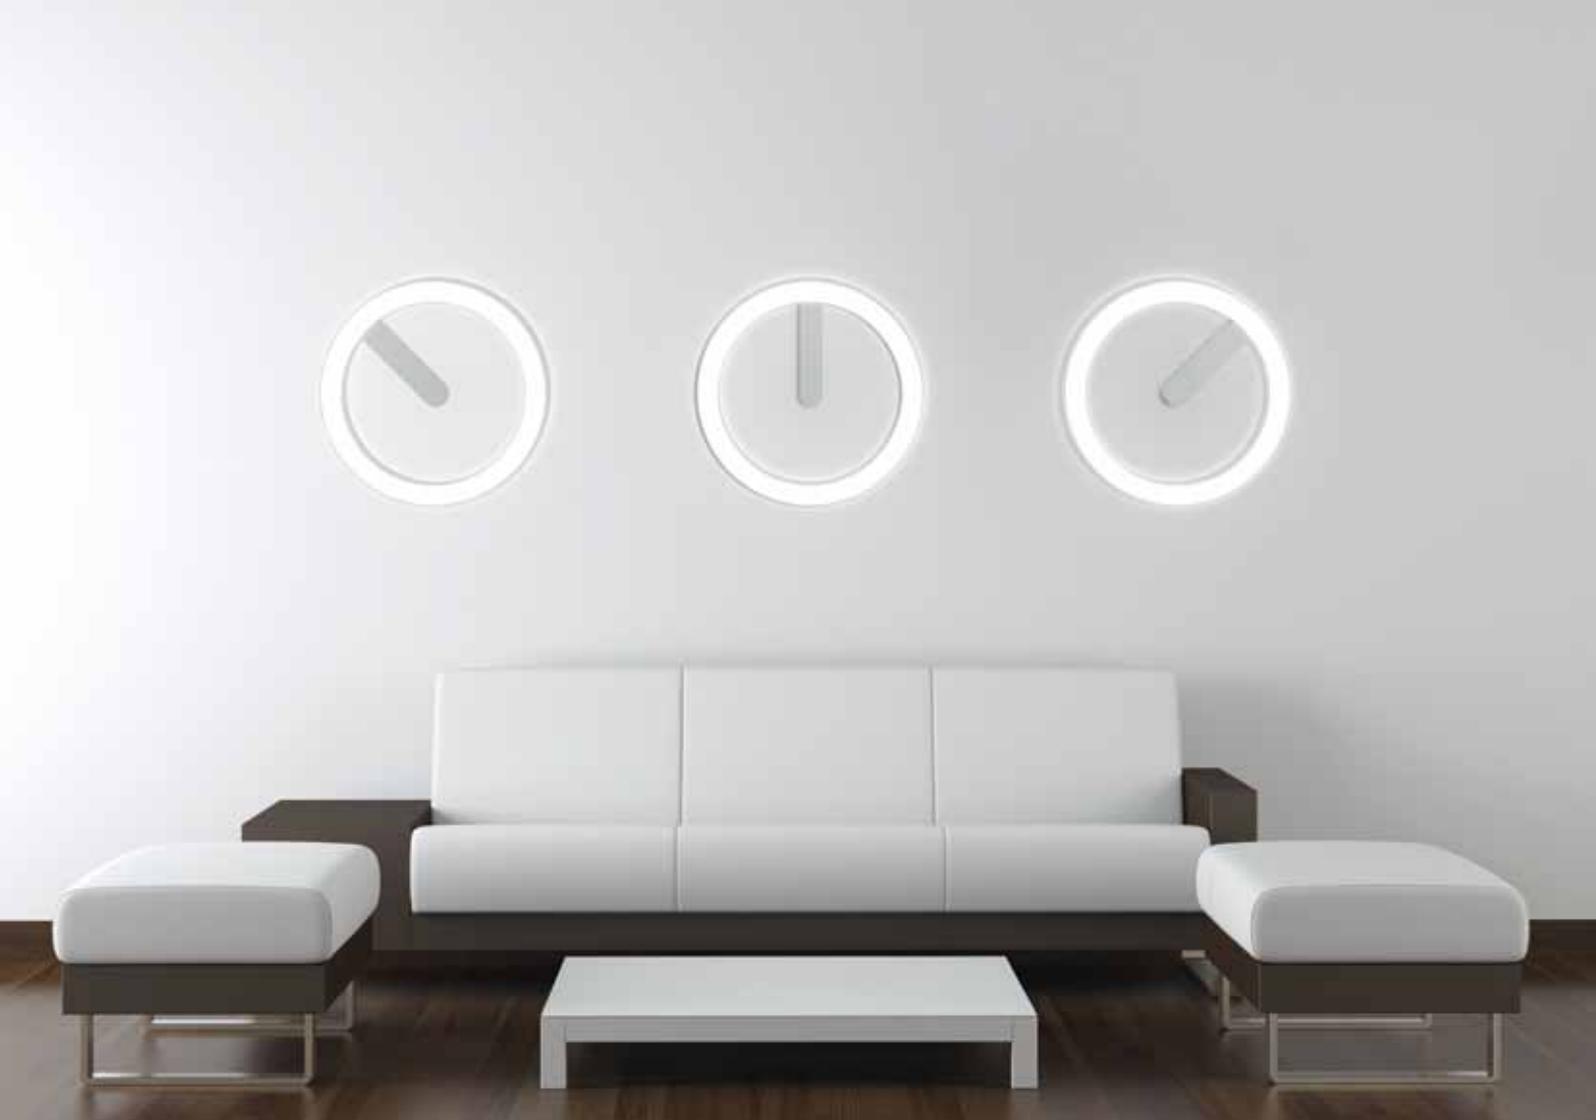

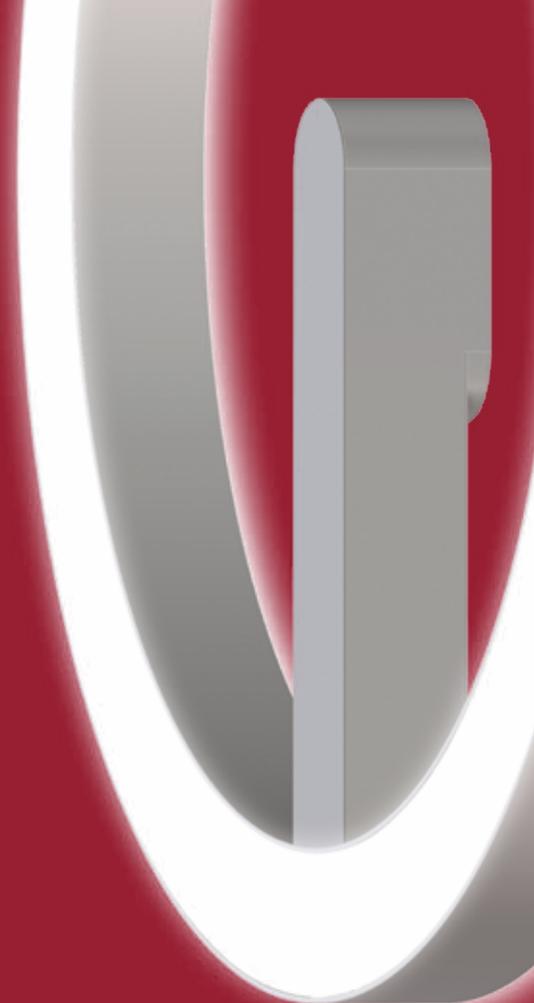

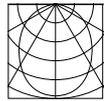

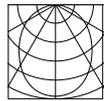

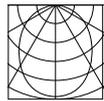

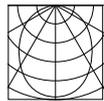

Long-time reading and work at monitors affect your eyes, fatigues and reduces the concentration. The light ring desk lamp is available in different light temperatures and is continuously dimmable. That enables the customer to adapt the required light to the working situation, making reading and work more comfortable. Fixed to the desk, secured against tilting, it becomes a part of the design.

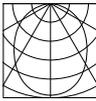

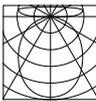

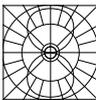

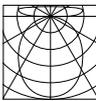

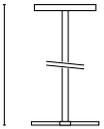

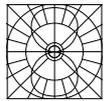

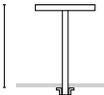

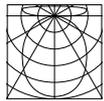

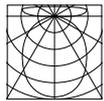

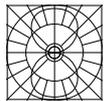

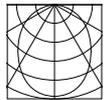

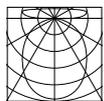

This light ring as surface-mounted luminaire is a simple, but effectively light idea. It can be used for general lighting, because of its high light output, without losing its light character. Mounted with a little gap between luminaire and wall, an effectively corona is visible. This creates a modern, pure ambience.

► Following mounting systems are available for suspended light rings (P. 04):

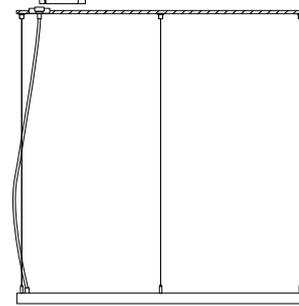

1. Recessed canopy
(Order-Code **EB**)

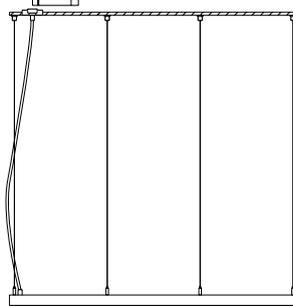

2. Surface mounted canopy
(Order-Code **AB**)

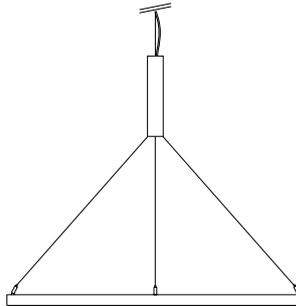

3. 3-Point suspension
(Order-Code **DP**)

4. 4-Point suspension
(Order-Code **VP**)

5. 4-Point pendant tube suspension
(Order-Code **PR**)
